REPORT OF THE SCHOOL BOARD

To the Citizens of Newton:

In compliance with the new school law enacted by the Legislature of 1918 the report of the School Board covers the period from Sept. 1, 1918 to Aug. 31, 1919, this date marking the end of both the scholastic and fiscal year.

Notwithstanding the fact that there were numerous interruptions to the work, all of which were a source of irritation not only to teachers and pupils, but to the parents and School Board as well, very good progress was made in all the schools, and we believe that the work done and the ground covered will compare favorably with that of previous years. Our schools were broken up more or less by illness, the first term particularly being closed three weeks due to the prevalence of influenza. In December, the Village schools were closed two weeks owing to the burning out of the heater, and necessitating the installation of a new heater at a cost of \$512.00.

Necessary repairs were made on and in the different school buildings. New steps were built at the Rowe's Corner school and new doors replaced the battered ones at the Junction school. In order to comply with the new school law numerous repairs and changes will have to be made at the Junction and Rowe's Corner schools, especially the toilets. This subject should compel the closest attention of all parents who have children attending our schools, as it is one which not only concerns their present health and welfare, but their future as well.

The grammar school was taught by Miss Flora M. Tuck, a teacher of long experience. The pupils made excellent progress under her faithful and thorough teaching. It may be interesting to those who are not aware of the work done by the pupils, to know that those who were graduated passed the Sanborn Seminary examinations with marks that reflected credit on both teacher and pupils. While none entered the Seminary it proved their ability. Those who entered Haverhill High school were also a decided credit to their teacher.

The Village Primary school was taught by Miss Margaret M. Ingalls who has also been a successful teacher for a number of

years. The children under her care were orderly and always seemed interested in their work. Those who entered the grammar school at the beginning of the new year passed very creditable examinations.

Miss Ruth M. Currier was in charge of the Junction School during the first term. She resigned at the end of the term and accepted a more lucrative position.

Mrs. Edna E. Carlton was engaged to teach the remainder of the year. Mrs. Carlton gave unusually good satisfaction, her work being of the highest order, her pupils progressing rapidly and harmoniously.

The Rowe's Corner school was taught by Miss Angelia E. Kelly with very good success until the early part of the winter term when she was stricken with pneumonia, and compelled to give up her work for eleven weeks. Miss Margaret M. Ingalls was engaged as substitute teacher for two weeks while the new heater was being installed at the Village school.

Mrs. Marion A. Stafford was then engaged as substitute teacher, and gave excellent satisfaction during the nine weeks she taught the school. Miss Kelly, after her recovery, returned and taught the last term with her usual success. There were none from this school to enter the Grammar school as there were no pupils in the sixth grade.

The work in our schools has suffered somewhat by the irregularity in attendance on the part of some of the children. This particular fault is very detrimental to good, thorough work in any school. Pupils who are not regular in attendance not only make it much harder for the teacher, but for themselves as well, and injured their standing in the grade or class to which they belong. It is oftentimes impossible to regain the time and studies they have lost, and consequently are compelled to drop back into a lower grade before they can finish the work prescribed by law. Therefore, we would, as in the past, again urge the parents to keep their children in regular attendance at school. It is true that the present high wages paid in shops and factories, coupled with the high cost of living, are a source of temptation to both parents and pupils. It is also true that many times it seems as though the children must be kept at home a day or two, possibly more, to help in times of sickness, but we who did not enjoy the advantages and privileges afforded by the schools of to-day, should be willing to make sacrifices in order that our children may make

the most of the schools provided for them. Never before in the past, has there been such a demand for the educated young man or woman to fill responsible and lucrative positions. Our common schools are the foundation, and it is up to the pupil, aided by the parent, to complete the structure so that they may reap the benefits to be derived from a practical and thorough education.

The Selectmen are hereby notified they may assess the following:

District Supervisors.....	\$290.00
Tuition.....	600.00
Medical Inspection.....	30.00
District Officers.....	80.00

To the School Committee and Citizens of Newton:

I herewith submit my report as Superintendent of Schools.

Since I have been superintendent only since September first, my report must be brief and general in character.

The aim of the work of all schools must be to fit boys and girls for citizenship. In the elementary schools the work aims to establish habits of industry and honesty in thinking by means of the daily lessons. If a teacher accepts work below what the child can do, or if she gives him a mark for this work higher or lower than he knows he has earned she is thereby encouraging him in the doing of poor work and is establishing dishonest habits of thought. Furthermore his ability to do work is not being cultivated and he ceases to grow. To give him what he has not earned tends to set him to expecting something for nothing—tends to pauperize him.

Too much emphasis cannot be laid on the matter of thoroughness in the fundamentals: reading, writing, clear enunciation

in speaking, addition, subtraction, multiplication and division, and a good working knowledge of simple fractions and decimals in arithmetic, and a fair knowledge of grammar, of history, geography and physiology, together with a fair understanding of our government and other institutions. Such work is imperative in our elementary schools, and with this gained under an inspiring teacher the child will go on indefinitely.

The school law passed by the legislature of 1919 is the most progressive as well as the most comprehensive piece of school legislation so far enacted by any state and its provisions place New Hampshire educational system in the very front of the state systems of the country. The most important changes effected are:

1. The establishment of a State Board of Education with functions and duties that its members may not delegate to its executive officer, the commissioner of education.

2. The establishment of state wide supervision of schools under approved superintendents. These superintendents while nominated by the joint committee of the supervisory districts are elected by the state board of education and are a state official whose duties and powers are defined.

3. The fixing of a minimum of 36 weeks of school for elementary schools.

4. The definition of what shall constitute an approved elementary school.

5. State wide certification or approval of teachers and that the state board shall fix standards of qualification to be met in order that approval may be secured.

6. A requirement that all common school branches shall be taught in English and that Americanization schools shall be conducted for persons who cannot read or speak English.

It further requires that selectmen shall assess a tax of \$2.00 per pupil of entire registration for the preceding year to defray the expense of state wide supervision, and a tax of \$3.50 per thousand of the value of ratable estate assessable for the current year for the support of elementary schools, Americanization schools, the purchase of text books, pupils' supplies and flags and appurtenances and the supervision of the health of the children. This

sum may be increased by vote of the district to any sum up to \$5.00 on the thousand but to districts in which the sum produced by a tax of \$5.00 on a thousand is not sufficient the state shall provide the balance from funds appropriated for this purpose.

The intention of the law is to make of the state one big school district with a view to giving to the children of the small town whose property value is small and whose tax rate unreasonably high, educational opportunities as nearly as possible equal to those of the city and large town in which commerce and manufacturing and the opportunity to earn money make the payments of higher taxes much easier than in the back section where no such opportunity exists.

The first principle of this law is equalization of educational opportunities for all children in the state, the second is the standardization of the schools.

In towns like ——— the cost of running the schools will not likely be less and may be slightly more than under the old law, but owing to the increased cost of living and the consequent higher salaries paid this year it is impossible to make a close estimate.

Until this year it has never been difficult for ——— to get graduates of the Lowell or of the Salem Normal school to teach here for a year or two or until they found a situation in or near their home town or city. The demand for young women in the mills and offices of the cities and the fancy wages paid have drawn from the teaching force many already at work but specially have attracted the recent graduates of the normal schools who would ordinarily be candidates for teaching positions in these towns near the state line. The young graduates of high schools have also been drawn in and the attendance in many normal schools has been cut 50 per cent.

There are not enough trained teachers left to go around this year. And during the next few years conditions will grow worse rather than better until manufacturing shall have caught up with demand.

The plan of certification of teachers now being put into effect that requires at least some professional training will go far towards safe guarding the standards of work already established here.

One other factor that will help to solve the teacher problem and in fact the whole problem of education in country districts is for people to get back somewhat to the old time social attitude and

establish friendly relations with their children's teacher. The teacher is just a human being neither better nor worse than the average of human beings and it will make her do better work with the children if the people of her community accept her in this spirit.

Furthermore I would strongly urge parents of girls who will graduate from high school this year to consider well the opportunities for service of the highest character that are opening in the teaching profession. To be sure they will have to work hard, and the return in money will not make them wealthy but they will have the satisfaction of having an important part in the greatest, the noblest work in the world—that of moulding the character of the next generation, of helping to establish the principles by which this country will be governed. They can probably make more weaving cotton or stitching shoes. But the cloth soon wears out and the shoes soon become worthless, their money is soon spent and the pleasures bought with it are quickly gone. But the character and principles of right living and right thinking established by the patient conscientious teacher will go on and express themselves in cleaner living, and better citizenship long after her own heart has ceased to beat.

So far we have not found it possible to secure for the Junction school such a permanent teacher as we want. We are still searching. The time thus far lost we will make up later in the year.

I thank committee and teachers for their support and co-operation.

Respectfully submitted,

JAMES A. MACDOUGALL,

Superintendent.

TREASURER OF SCHOOL BOARD REPORT

The appropriations for school purposes made in March 1918 are included in the above statement, and the balance \$3,436.78 shows the total available resources for the year ending Aug. 31, 1919. Since this amount was entirely inadequate to carry the schools thru the year, and since the district failed to make any appropriation to meet the necessary expenses of the schools for the remainder of the year, that is, for the spring term of 1918, the Selectmen continued to honor the orders drawn by the School Board beyond this amount (\$3,436.78) to the extent of \$995.41. In other words the Board of Selectmen loaned the district this sum out of town funds and in order that the town be reimbursed it is necessary for the district to appropriate this amount for this purpose. As the appropriation of \$5.00 per thousand of assessed valuation did not become available until Sept. 1, and no part of it may be used before that time, it is necessary that the whole of this amount be available on that date if the district is to receive any state aid.
